Semi-automatic portable system

Basic-S

Semi-automatic TIG *orbital* welding system for tube to tube sheet welding

The **Basic-S** machine is the basic portable model, ideal for simple applications and created for **tube to tube sheet TIG orbital welding**. Its distinguishing features are **low cost, simplicity and robustness** and consists of:

- **Welding head** (generally the **MWH70** or selected from a variety of models) which includes:
 - power source- welding head connection cable, 8 mt. length (26 Ft)
 - electrical earth cable, 4 mt length (13 Ft)
- **MW-240 power source** mounted on wheel trolley including:
 - inverter power source
 - analogue digital programmer
 - motor drive modules
 - cooling unit
- **Remote control** for manual controls (start, stop cycle, emergency)
